I request that you reject the NAB's petition 04-160/HR 4026, as I switched to satellite radio to begin with to escape the stranglehold that Clear Channel already has (and that the FCC has given them) upon the local radio market. I refuse to listen to the programming that I am required to hear if I choose to listen to local stations. I would rather pay to listen to radio than listen to the mindless, inane, trash that is my alternative. I need the traffic and weather on XM (or Sirius, which is what my husband has in his company vehicle) so that we can make it through each workday with as little hassle as possible.
